

Want to learn about FASTER, EASIER and MORE ACCURATE food analysis ??

Waters Australia presents....

Jennifer Burgess

Jennifer Burgess is the Director of Food and Environmental Market Development at Waters Corporation. Her team is responsible for understanding needs of those markets and how technology can address those needs. Her team makes recommendations on emerging areas of scientific relevance and development of new technologies through customer interactions, government reports, peer-reviewed journals and scientific meetings. They work closely with key opinion leaders in industry, academia and government to ensure delivery of relevant information in response to changing needs in the food and environmental markets.

We invite you to join us for a half day seminar.

Date: Wednesday, 9th November 2016

Venue: Room 132, Sir Llew Edwards Building (Building 14),
Campbell Rd, University of Queensland, St Lucia Campus
